ABOUT ME

I am a Programmer with 6-7 months of internship experience, contributing to real-world web and desktop applications. I have hands-on experience with frontend tools like Vue.js, Tailwind CSS, Bootstrap, and jQuery, and backend frameworks including Laravel, Spring Boot, ASP.NET, and C#.

I enjoy solving technical challenges, building clean and user-friendly solutions, and collaborating with teams to deliver impactful projects. I can manage both frontend and backend tasks, integrate APIs, and handle databases efficiently.

I am eager to grow as a developer, take on meaningful projects, and make a tangible impact with my programming skills

WORK EXPERIENCE

Internship - ACLEDA University Of Business

Software development

Dec 2024 - Aug 2025

- Developed and maintained web applications using HTML, CSS, JavaScript, jQuery, Bootstrap, Tailwind CSS, and ASP.NET
- Collaborated with the team to design user interfaces and improve user experience
- Assisted in backend development using ASP.NET and SQL Server database management
- Used Git and GitHub for version control and teamwork.
- Worked with Figma to create and implement design prototypes.
- Learned and practiced web development best practices and debugging.

EDUCATION

Bachelor's Degree in Computer Science And Engineering

ACLEDA University of business, Cambodia

2023 - Present

- Gained practical experience in web design, backend development, and database systems
- Learned programming languages including C#, Java, and PHP
- Built applications using frameworks such as Django and worked with REST APIs
- Studied database technologies like SQL Server, MySQL, and Oracle
- Developed foundational knowledge in UI/UX design and mobile development using Flutter for Android
- Learned Windows Server Administration, Computer Networking, and Data Analytics fundamentals
