ABOUT ME

Programmer with hands-on experience maintaining and developing production web systems during an active internship. Work across applications built with Laravel, Vue.js, and Next.js, contributing to features, fixes, and system improvements used in real operations.

My responsibilities go beyond front-end development and include backend API work, MySQL database handling, and application deployment on Ubuntu servers using Apache2 and PM2. I regularly analyze problems, debug issues, and support system stability across front-end, backend, and server environments.

Driven to grow as a programmer who understands how complete systems work in production.

WORK EXPERIENCE

Internship - SOB CO, LTD

Software Developer

Nov 2025 - Present

- Developed and maintained applications based on business requirements, translating operational needs into functional features.
- Implemented front-end components using Vue.js, Next.js, HTML, CSS, JQuery, and Tailwind CSS / Bootstrap.
- Built and integrated backend APIs using Laravel to support business workflows.
- Worked with MySQL databases to ensure data accuracy and system reliability.
- Deployed and maintained applications on Ubuntu servers, configuring Apache2 and managing processes with PM2.
- Used GitHub for source code management, version control, and team collaboration.
- Implemented and maintained CI/CD pipelines using GitHub Actions to automate build and deployment processes.
- Performed problem analysis, debugging, and bug fixing across front-end, backend, and server environments.

Internship - ACLEDA University Of Business

Software development

Dec 2024 - Aug 2025

- Developed and maintained web applications using HTML, CSS, JavaScript, jQuery, Bootstrap, Tailwind CSS, and ASP.NET
- Collaborated with the team to design user interfaces and improve user experience
- Assisted in backend development using ASP.NET and SQL Server database management
- Used Git and GitHub for version control and teamwork.
- Worked with Figma to create and implement design prototypes.
- Learned and practiced web development best practices and debugging.
